# 1. App Logo

---

## 2. Colors of choice

---

Theme Color  
#BA03FF

Secondary Color  
#00D8CB

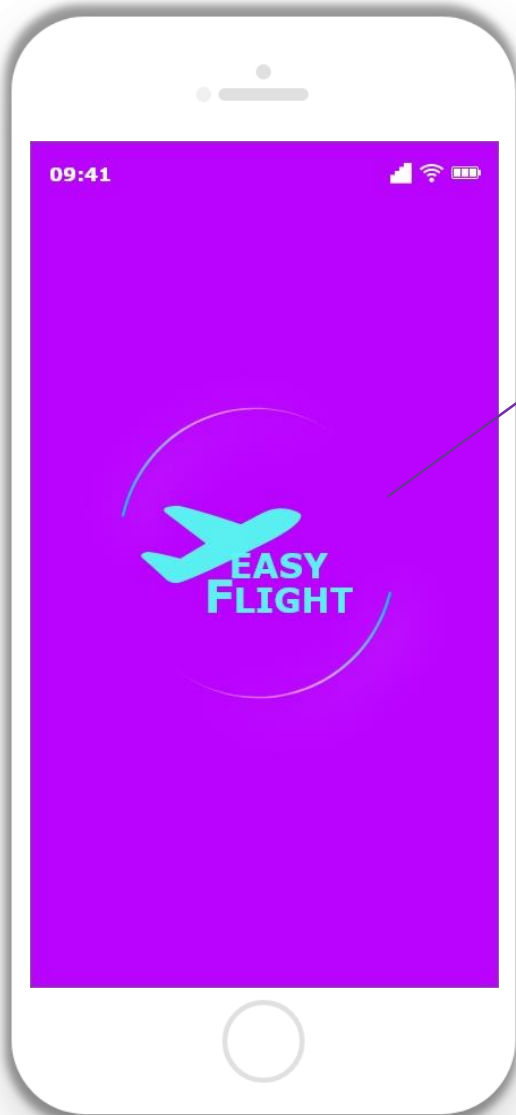

Background  
Color  
#F3DBFF

Background  
Color  
#BCEFECE

### 3. Starting the app

---

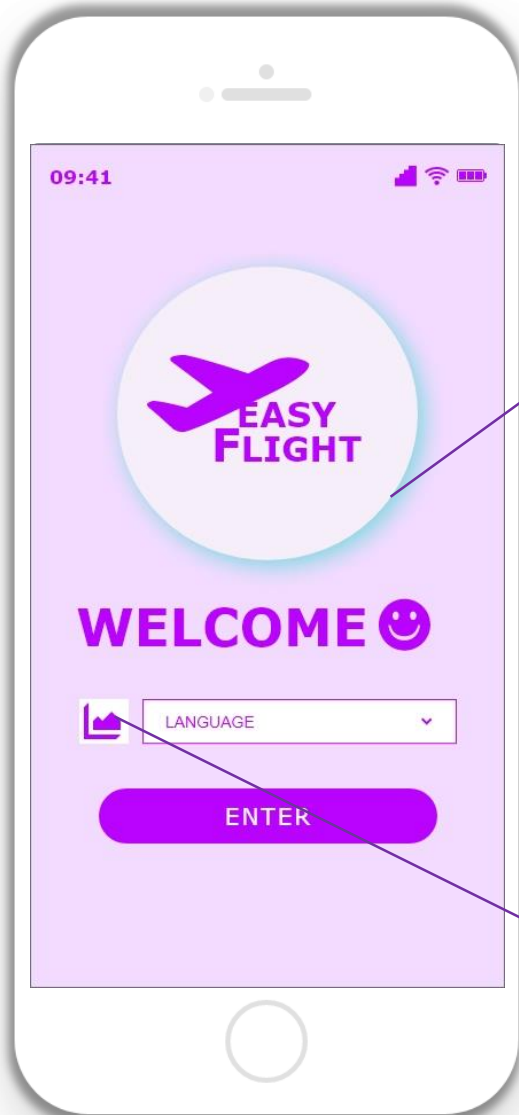

When starting the app, this screen appears.

The gradient half circle lining around the logo will be spinning for 2-3 seconds until the landing page is displayed.

## 4. Language Setting

---

The logo will be displayed in the white circle. Around the circle, mint-colored light will be appeared and shined for 1-2 seconds and then stays until the next screen comes.

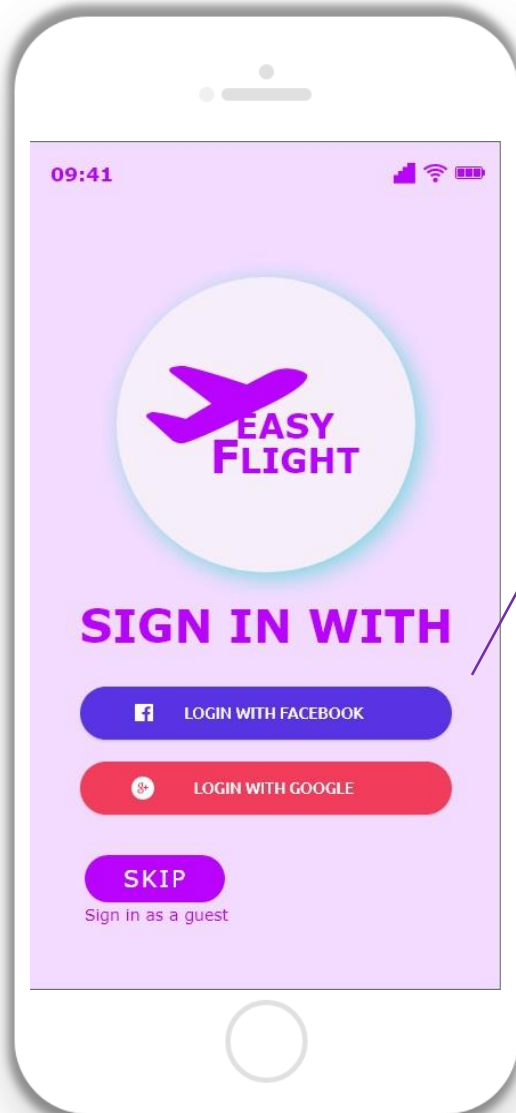

Before selecting the language, this box has no image displayed.

Once it is selected with a language, then the representative national flag of the language will be changed.

For English language, however, the flag is United Kingdom.

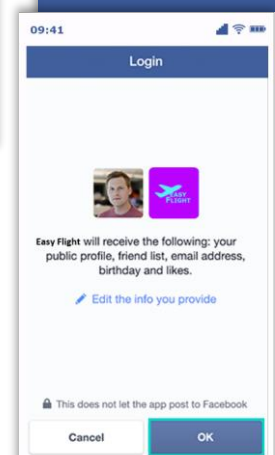

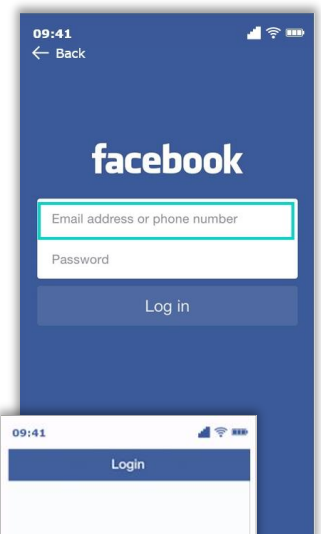

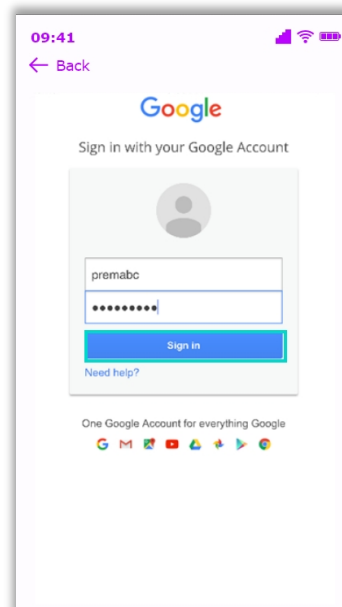

## 5. Sign-In Options

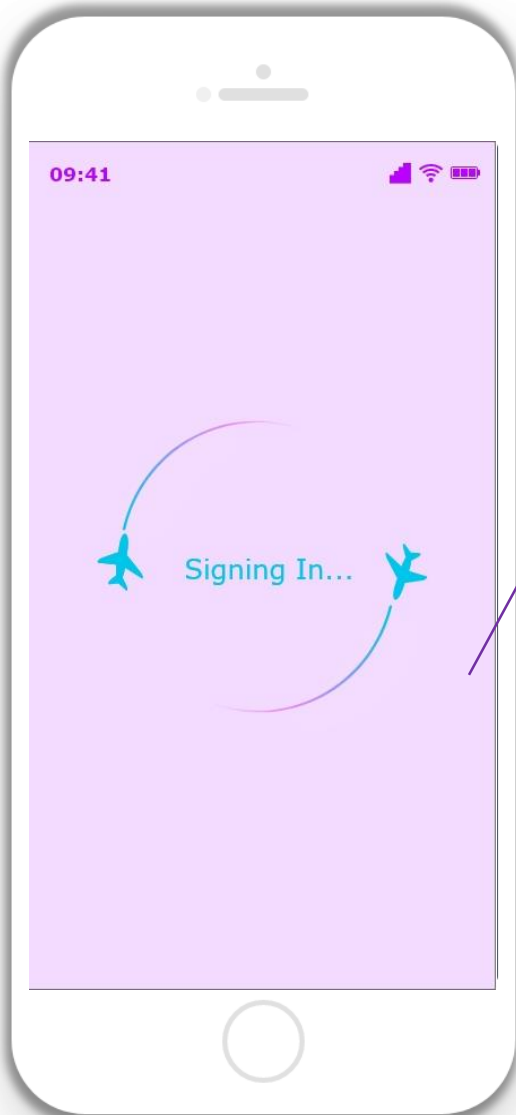

Total 3 sign-in options available.

- 1) Login via Facebook
- 2) Login via Google
- 3) Skip and sign in as a guest

## 6. Signing-In Screen

---

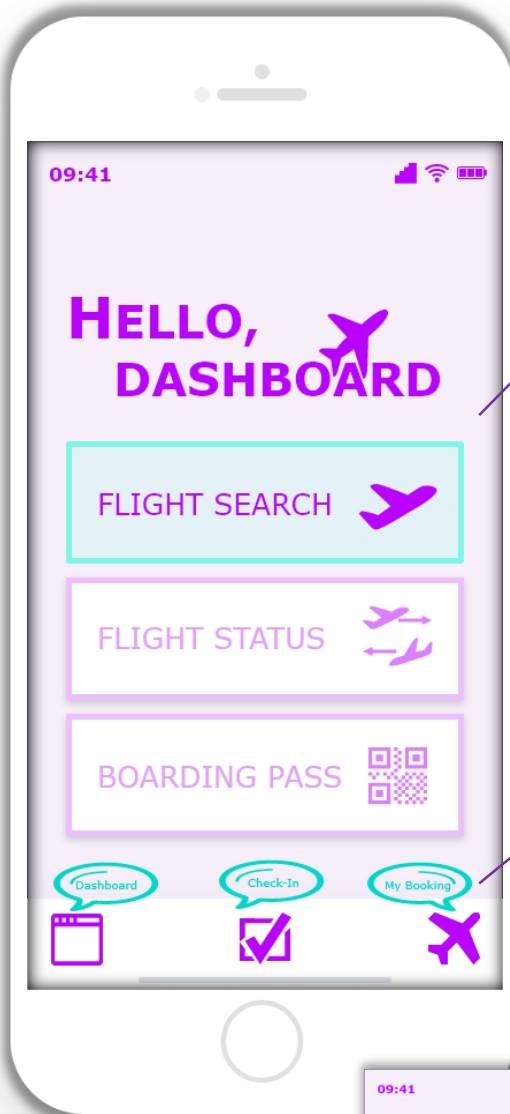

While signing in for all three sign-in options, during the moment this screen will be displayed.

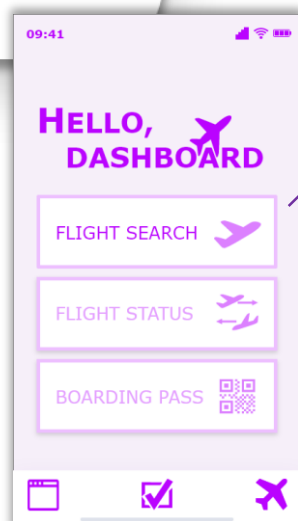

These half circles with airplane icons will be spinning around the „Singining In...” text, until it turns into the next screen.

## 7. Homepage / Dashboard

This is like a homepage of this app.

When landing to this page for the first time, bubbles will be popped up and stays for 3-5 seconds to tell the users what each button means.

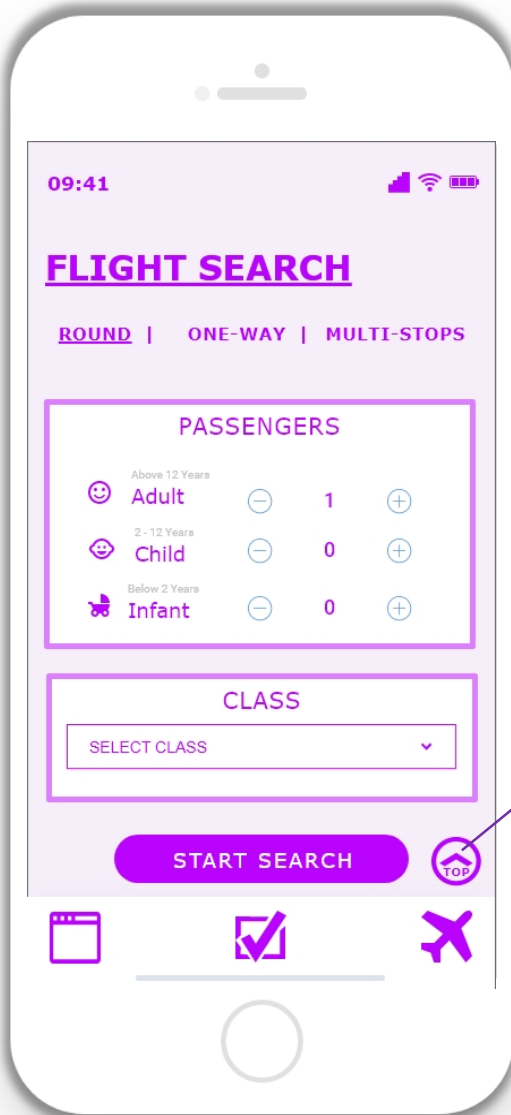

After that, the normal dashboard will look like this.

When one of the menu is selected, the frame will turn to mint color and will shine.

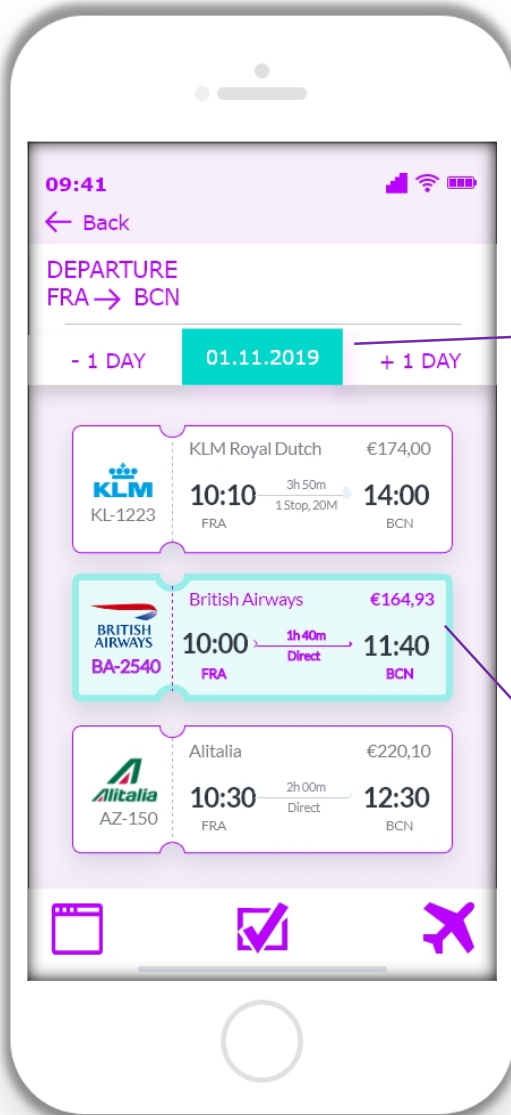

## 8. Scroll-up button

---

When tapping on this button, the users will automatically jump to the top side of the screen, without having to scroll up.

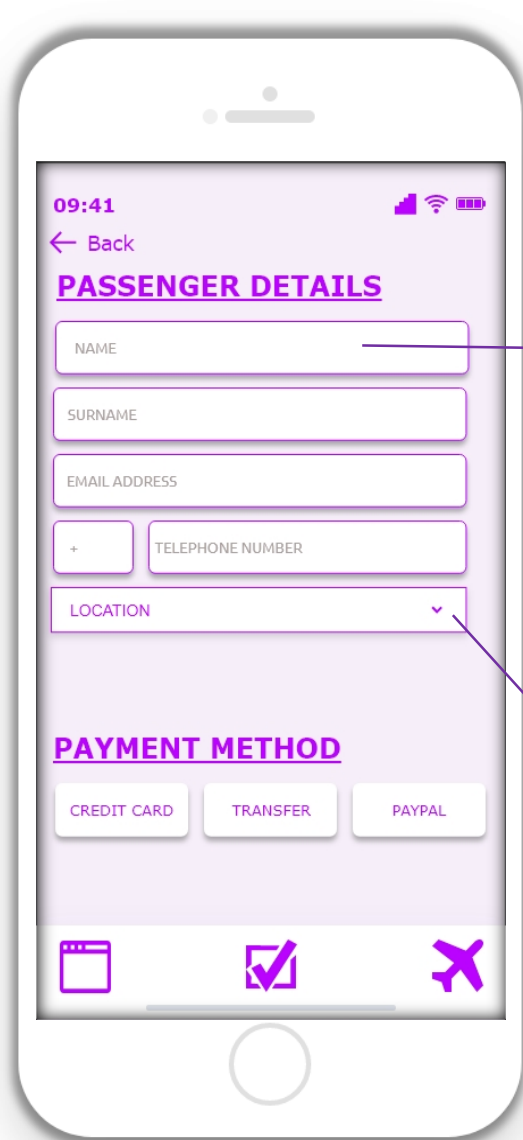

## 9. Selected Tab Color Change

When one of the tabs is selected, the tipped one will be displayed in mint color and the font will be turned to white.

When a flight offer is selected, the chosen one's outline will turn to the mint color, the background will be changed to light mint color as well and will be shined.

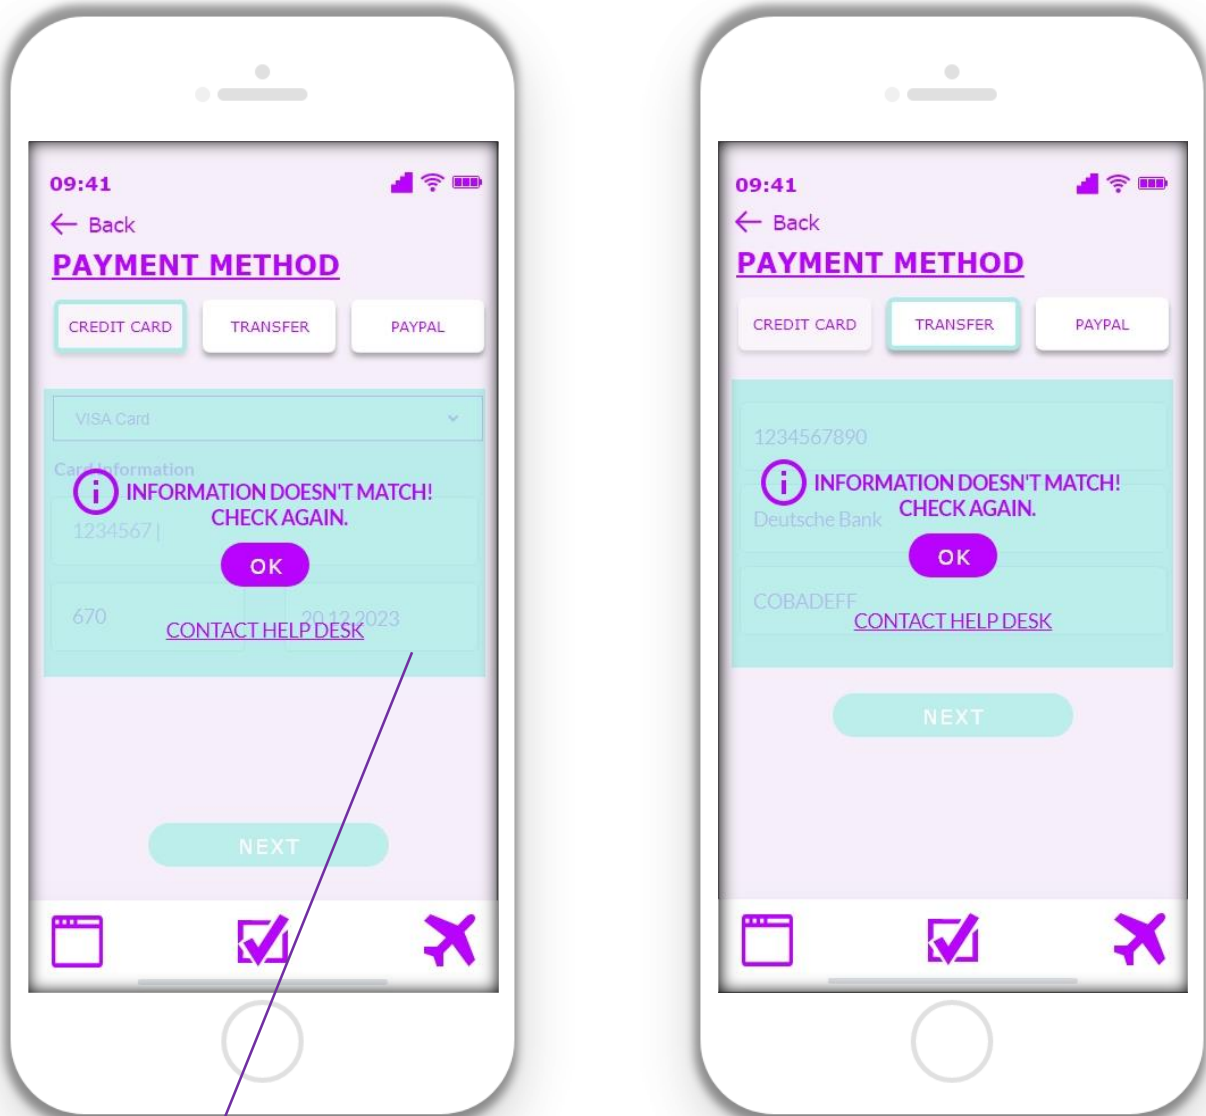

# 10. Passenger Detail

In each text field, the grey description will be appeared. As the users enter the information, the description letters will be disappeared.

Select the location, by tipping the drop down button.

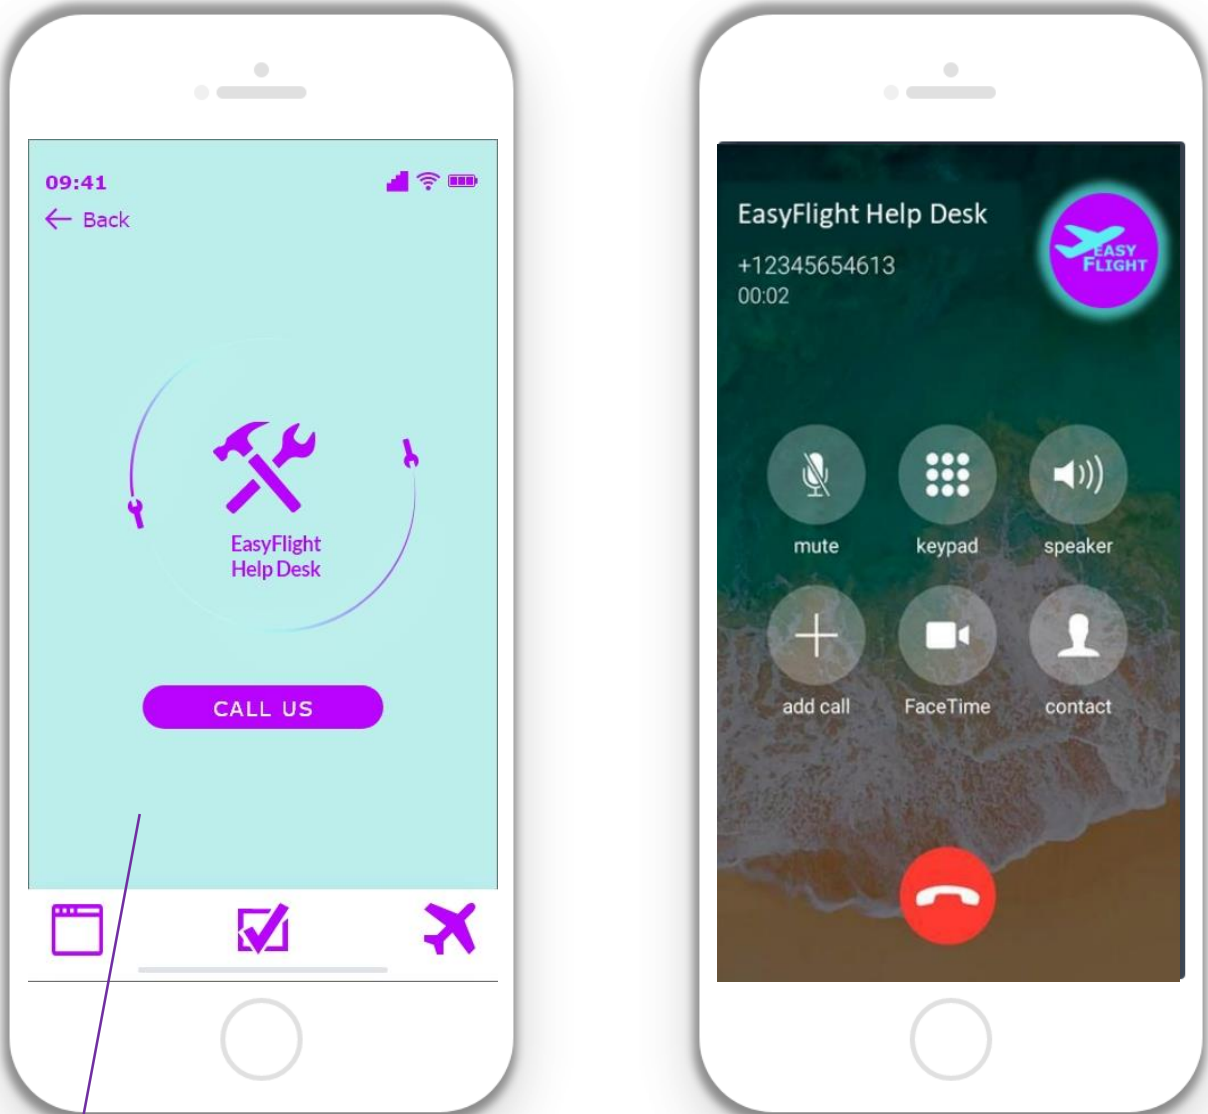

## 11. Error Messages

For credit card and bank transfer payment options, when the given card information or account data do not match, the error message will pop up.

Then the data field will be covered by see-through mint colored box and the users will be asked to proceed again, by tipping OK or contact the helpdesk.

## 12. Connect to helpdesk

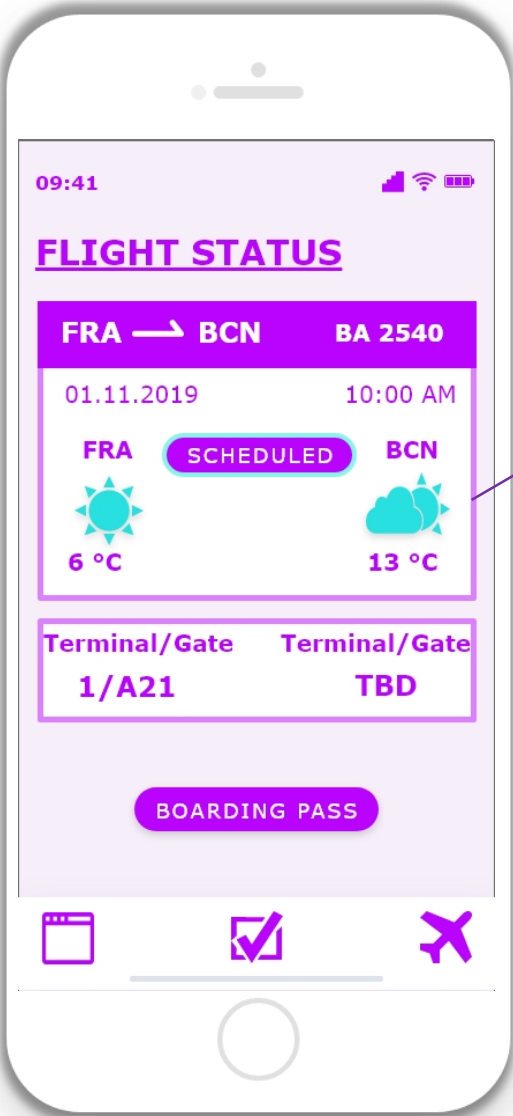

When tapping „contact helpdesk“, this screen will be displayed.

The half circles with the tool icon will be slowly spinning.

When the users hit the „call us“ button, the direct call to the helpdesk will be routed.

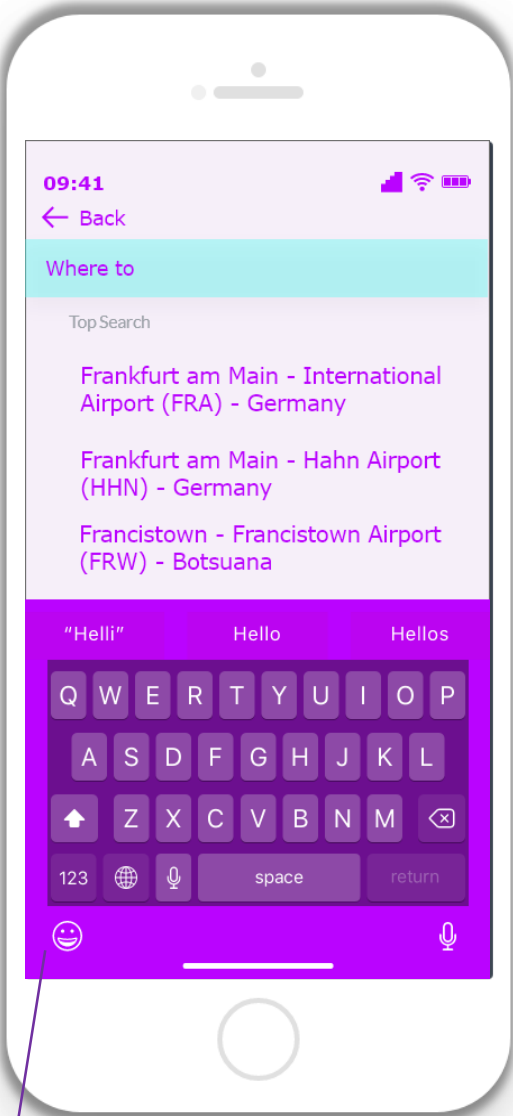

# 13. Local Weather Display

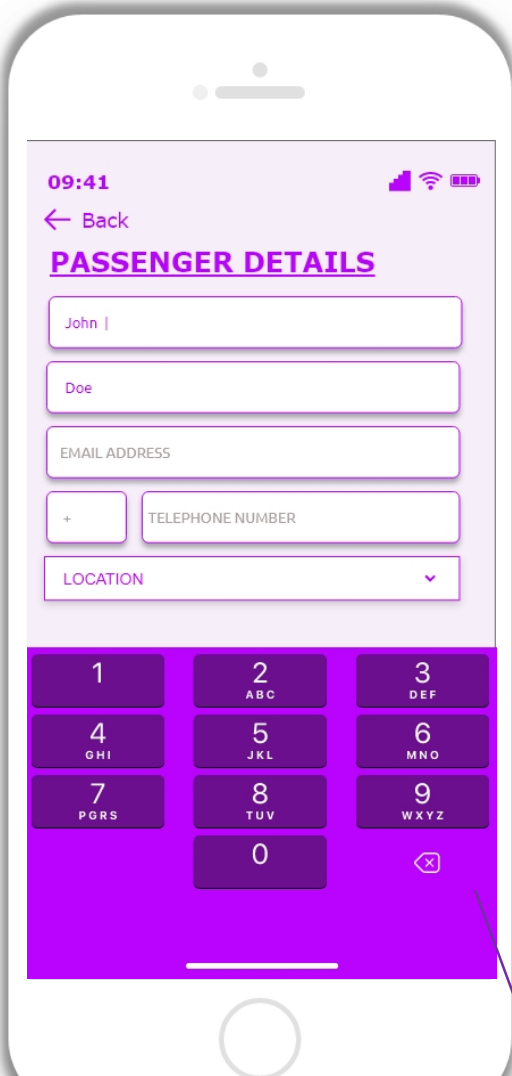

As a helpful information to the travellers, when checking the flight status, the local weather will be displayed.

The weather forecast data will be based on the weather and time app already installed to the mobile phone.

# 14. Keypads

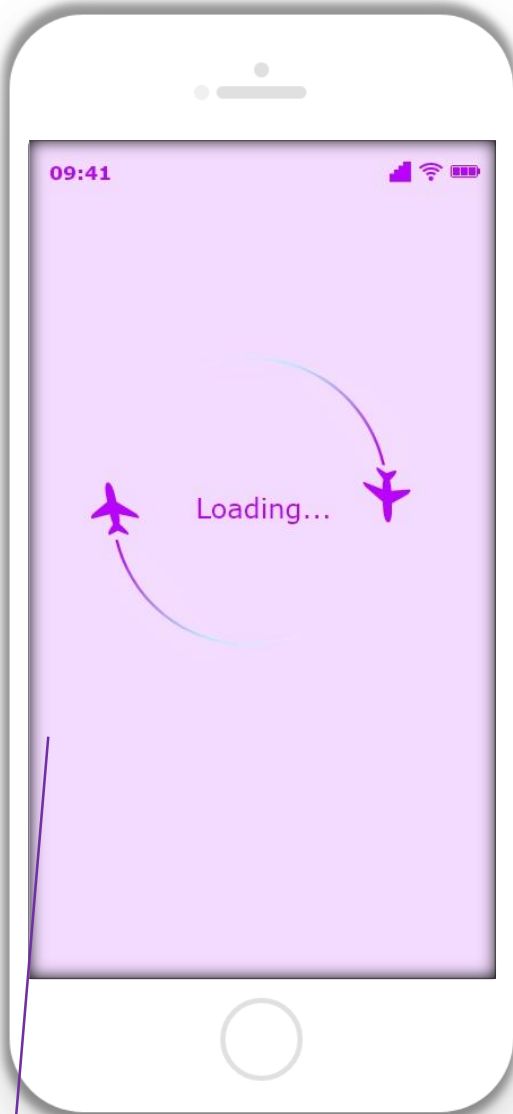

When tipping in the text fields, the keypad will be displayed like this.

When tipping in the text fields that require numbers, the number pad will be displayed like this.

## 15. Loading Screen

---

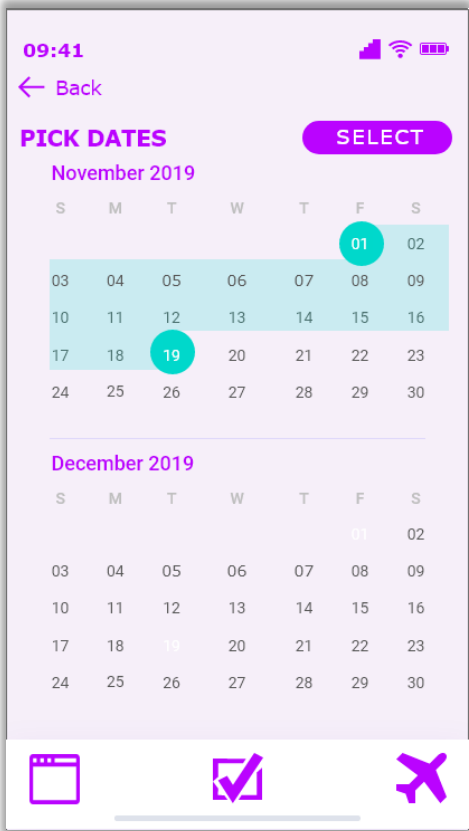

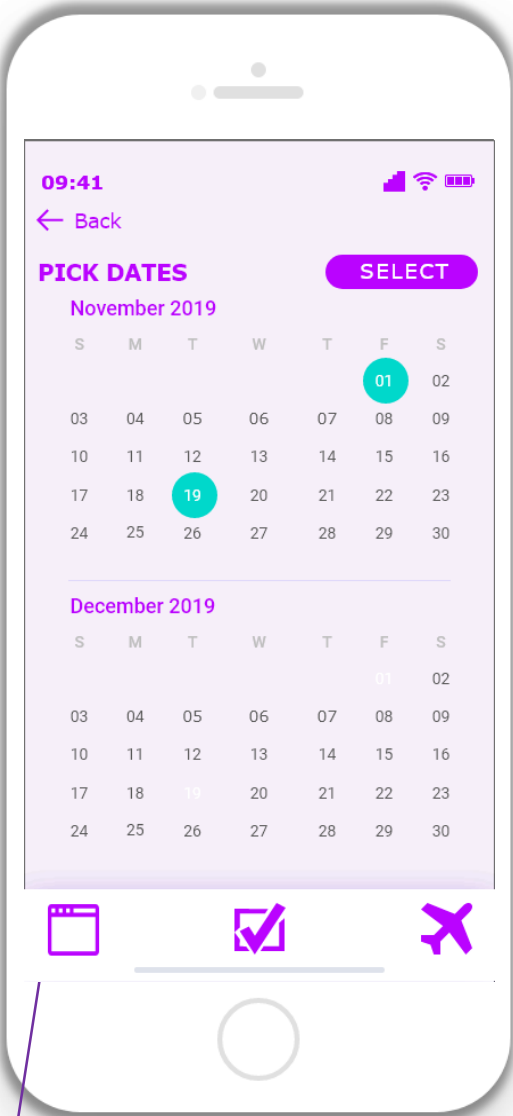

As a small variation, the direction of the airplanes and the spinning are the opposite from the signing-in screen.

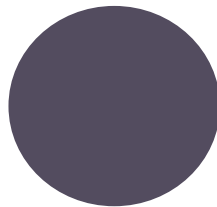

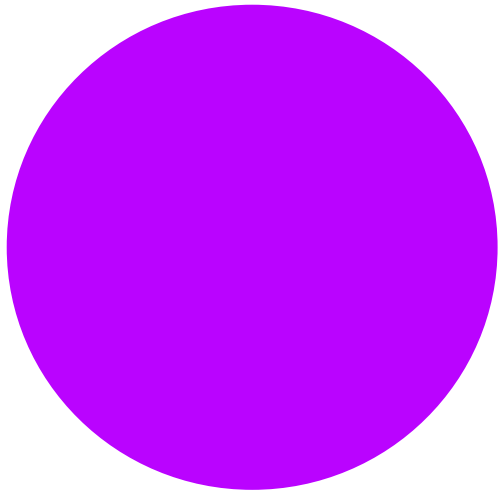

For instance, when loading for the payment, this screen will be displayed. Just like the signing-in screen, the half circles with the airplanes will be spinning until the screen turns into the next page.

# 16. Date Selection

Once the departure and return dates are tipped, the timeframe will be marked in see-through mint color.

Thank you.
